CONVENIENT BALANCED NUTRITION WITH ACTIVMAX

Busy days can make it hard for you to stick to your goal of eating healthily to support your health. Sometimes you may be too busy at work, tied up in meetings, not feeling hungry, or even grabbing something convenient but unhealthy along the way. Whatever the reason is, skipping meals and eating unhealthy foods can make you feel weak and lethargic, unable to focus, and feel hungry.

ACTIVMAX provides a convenient and nourishing solution for your everyday nutritional needs that will keep you refreshed, energetic, and feeling satisfy.

WHAT ACTIVMAX BRINGS TO YOU?

ACTIVMAX is a range of nutritional drinks specially formulated to cater different needs and lifestyles. They are all with one thing in common—ACTIVMAX Core Nutrition, the science-based formula for a complete and balanced healthy meal.

Balanced Ratio Of Carbohydrates, Fats & Proteins

1

Low Glycemic Index (GI) With Slow-Carb Technology

2

Healthy Fat Blend With Omega 3-6-9 Fatty Acids + MCT Oil

3

High Quality Plant-Based Protein With Complete Amino Acids

4

6 **ACTIVMAX**
Core Nutrition

1 Balanced Ratio Of Carbohydrates, Fats & Proteins

ACTIVMAX nutritional drinks contain a balanced ratio of macronutrients: <40% carbohydrates, >40% fats and 20% proteins. This ratio provides stable, long-lasting energy and essential components for maintaining good health.

- Adequate to provide a quick energy boost to the body.
- Not in excess where they will be stored as fat.

- Provide long-lasting energy.
- Essential raw materials to form healthy cells and produce hormones.

- Build strong muscles.
- Utilized as cellular components and hormones.

Did you know that?

Balanced 40:40:20 ratio of macronutrients is the healthiest.

Researches have shown that diet with high carbohydrates, and low healthy fats are causing chronic diseases. Health authorities now recommend a balanced diet with <40% carbohydrates, >40% fats and 20% proteins, inspired by the Mediterranean diet for good health.

2 Low Glycemic Index (GI) With Slow-Carb Technology

ACTIVMAX nutritional drinks formulated with slow-carb technology are low in glycemic index (GI). Slow-carb technology prevents a sudden spike of blood sugar upon consumption, which is good for diabetes, weight watchers and keeping you energetic after!

What is Glycemic Index (GI)?

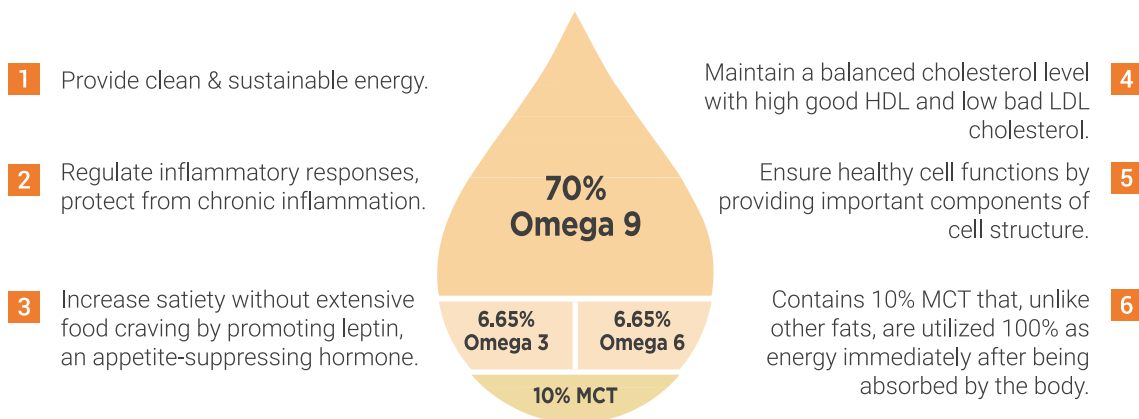

GI is a value assigned to carbohydrate-containing foods by how fast they boost blood sugar level. The lower the GI value of the food, the slower it is in increasing the blood sugar level.

- a** ACTIVMAX nutritional drinks raise blood sugar slowly and steadily. This gives enough time for the body to utilize the blood sugar completely.
- b** Therefore, this remains an optimum blood sugar level without excessive blood sugar storing as fat, preventing energy crash and maintaining a healthy weight.

3 Healthy Fat Blend With Omega 3-6-9 Fatty Acids + MCT Oil

ACTIVMAX nutritional drinks help you eat the right fat! We scientifically blend good fat sources—high oleic sunflower oil, flaxseed oil and MCT oil—to provide all the essential fatty acids to you in the healthiest ratio with no trans-fat and low saturated fat, according to recommended guidelines by the UNFAO*.

6 Benefits Of **ACTIVMAX** Healthy Fat Blend

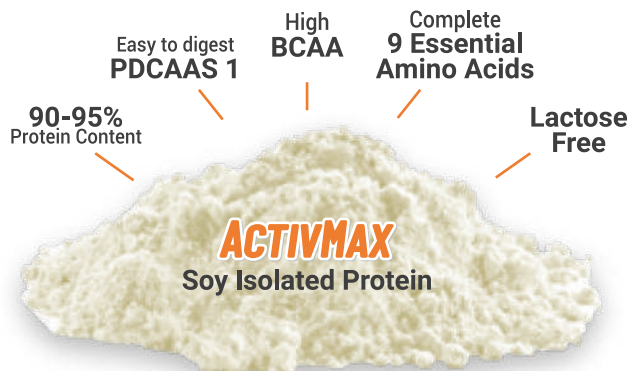

*Fats and oils in human nutrition: report of a joint expert consultation, UNFAO Food and Nutrition Paper No. 57, 1994.

4 High Quality Plant-Based Protein With Complete Amino Acids

ACTIVMAX nutritional drinks comprise of high purity soy isolated protein. It is the only plant-sourced protein which contains all the amino acids required to build strong muscles and, repair and maintain healthy bodily functions.

Why soy isolated protein?

- 1 Contain 90-95% concentrated high-quality protein.
- 2 The only plant-based protein with complete 9 essential amino acids.
 - Has PDCAAS (Protein Digestibility Corrected Amino Acid Score) score of 1.0, the highest rating possible and equal to that given animal proteins.
 - High branched-chain amino acids (BCAA) like leucine that support muscle metabolism.
- 3 Lactose-free suitable for lactose-intolerance individuals.

5 Complete With 28 Vitamins + Minerals & Plant Antioxidants

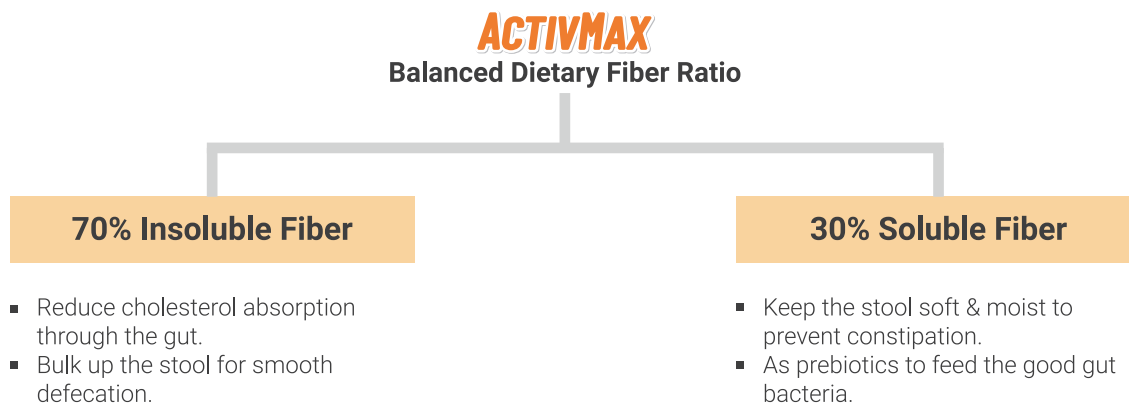

ACTIVMAX nutritional drinks contain a complete range of micronutrients (28 vitamins and minerals) plus plant antioxidants. These nutrients are involved in thousands of vital body processes, including cellular activity and protection, ensuring your body function optimally. Below are a few highlights of the main functions of these nutrients.

4 Main Functions Of **ACTIVMAX** Micronutrients & Plant Antioxidants

- 1 Energy generation from carbohydrates, fats and proteins**
 - Our body is not able to generate energy from the food without enough vitamin Bs, alpha lipoic acid (ALA) and CoQ10.
- 2 Regulation of the immune system**
 - Lack of vitamin C and D can lead to frequent sicknesses.
- 3 Maintenance of skin and blood vessels**
 - Vitamin C is crucial in building strong collagen of the skin and blood vessels.
 - Vitamin E plays essential roles as a potent antioxidant in maintaining skin and blood vessel health.
- 4 Protection from free radical attack**
 - Free radicals are harmful by-products produced excessively with unhealthy diet patterns and lifestyles, that appear to be related to chronic diseases.
 - Vitamin C, E combining with ALA, CoQ10 and plant-antioxidant-rich plant extracts like grape seed extract and turmeric extract form a strong antioxidant network. This network neutralizes harmful free radicals to protect your body effectively from free radical attack.

6 Natural Insoluble & Soluble Dietary Fiber In 7:3 Ratio

ACTIVMAX contain high dietary fiber, with insoluble and soluble fibers in a healthy ratio of 7:3, inspiring by the natural fruit's fiber composition. This unique blend of insoluble and soluble fibers makes it works the best in promoting a healthy gut environment, maximizing gut comfort and nutrient absorption for good health.

Why do you need this?

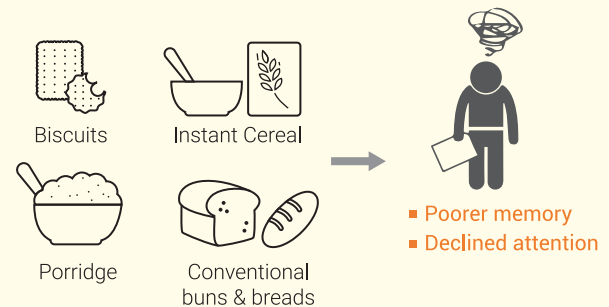

01

Will power is not the cause of weight loss struggles.

Fail to lose weight due to a lack of will power?

NO
Blame your wrong diets!

Typical wrong diet

- Too low calories and nutrition
- High carbs with high GI
- Low in healthy fats

02

Taking the wrong diet make your weight loss journey suffering, ineffective, and cause possible weight gain.

Too low calories and nutrition

- An extreme diet with too low calories is unable to support the body's metabolism, which triggers extensive craving and hunger.
- The lack of nutrition in the extreme diet reduce energy conversion from food, leading to tiredness.

Loaded with high GI carbohydrates

- Carbohydrate choices like noodles, white rice and white bread are high in GI, which fluctuates your blood sugar, causing repetitive craving and tiredness throughout the day.

Low in healthy fats

- A low-fat diet lacking healthy fats impairs the body's appetite control.
- Healthy fat intake triggers the secretion of leptin, the appetite-suppressing hormone that helps keep weight-loss sustainable.

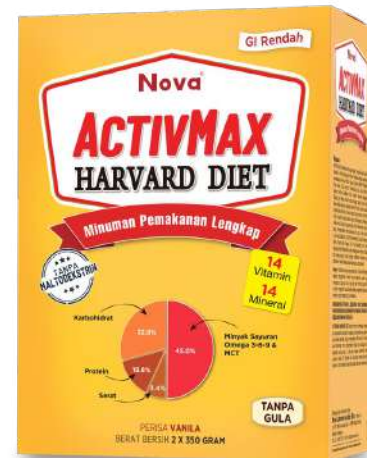

GAIN WEIGHT HEALTHILY & EFFECTIVELY
